Health care is facing significant cross-industry challenges and opportunities created by a number of factors including: the increasing need for improved access to affordable, high-quality care; growing demand from consumers for greater control of their health and health data; the shift in focus from “sick care” to prevention and health optimization; aging demographics and the increased burden of chronic conditions; and new emphasis on real-world, measurable health outcomes for individuals and populations. Moreover, the delivery of health information and services is no longer tied to traditional “brick and mortar” hospitals and clinics: it has increasingly become “mobile,” enabled by apps, sensors, wearables, and other mobile devices, as well as by the data that these technologies generate. This multifactorial transformation presents opportunities for innovation across the entire cycle of care, from wellness, to acute and chronic diseases, to care at the end of life.

But how does one approach innovation in mobile health to address these health care challenges while ensuring the greatest chance of success? At Stanford Biodesign, we believe that innovation is a process that can be learned, practiced, and perfected; and, it starts with a need. In Biodesign for Mobile Health, students will learn about mobile health and the Biodesign needs-driven innovation process from over 50 industry experts. Over the course of ten weeks, these speakers join the teaching team in a dynamic classroom environment that includes lectures, panel discussions, and breakout sessions. These experts represent startups, corporations, venture capital firms, accelerators, research labs, health organizations, and more. Student teams will take actual mobile health challenges and learn how to apply Biodesign innovation principles to research and evaluate needs, ideate solutions, and objectively assess them against key criteria for satisfying the needs. Teams take a hands-on approach with the support of need coaches and mentors. On the final day of class, teams present to a panel of mobile health experts and compete for project extension funding. Limited enrollment, by application only. Teams take a hands-on approach with the support of need coaches and mentors. On the final day of class, teams present to a panel of mobile health experts and compete for project extension funding. Limited enrollment, by application only.

**IMPORTANT:**  
enrollment by application only

Applications for Biodesign for Mobile Health will be in two rounds.

First round of applications  
- Opens: May 15;  
- Closes: September 3  
- Up to 28 Spots Available

Second round of applications  
- Opens: September 4;  
- Closes: September 24  
- Up to 8 Spots Available

**APPLY ONLINE AT:**  
tinyurl.com/bioe273-2017
Directors: Marta Gaia Zanchi, Ph.D.
Paul Yock, M.D.

Units: 3 units

Day/Time: Wednesdays 3:30 – 6:20 pm
Fridays 12:30 – 1:30 pm
Fridays are for team projects (no classes) and scheduled workshops

Location: (To Be Confirmed)
Stanford, CA 94305

Course Reader: No textbook required.
Online resources to be provided via Canvas.

Dates: The class is held each Wednesday of the Fall quarter (except during holidays) starting on September 27, 2017 and ending on December 6, 2017. Following regular class hours on December 6, a ceremony is held at Biodesign awarding the top students’ projects. All students are expected to attend a minimum of 9 class meetings and the awarding ceremony.

GOALS FOR THE COURSE

At the end of this course, students will:
- be able to ask informed questions and apply critical thinking to understand the evolving mobile health industry sector;
- be able to recognize, describe and apply the needs-driven Biodesign approach to the creation of innovative concept solutions in mobile health;
- have developed or refined the soft skills required to work in teams and with the support of external advisers and mentors towards achieving and presenting mobile health projects outcomes.

TOPICS COVERED

Biodesign process
Mobile health:
- enabling technologies
- design thinking
- policy
- value
- financing
- entrepreneurship
- corporate strategies
INSTRUCTIONAL METHOD

The Biodesign for Mobile Health course is taught by a combination of faculty from Stanford University and other academic institutions as well as invited speakers from the mobile health industry and entrepreneurial community. Students devote significant effort into working in teams, both under guidance by need coaches and mentors, and independently. The course provides a unique chance to gain real-world insights; to acquire or refine the soft-skills necessary to work in multidisciplinary teams and interact with outside experts; to build a relevant network of mobile health enthusiasts and professionals; and, to learn about career paths in health innovation.

The typical format of a Wednesday afternoon in the classroom is (with exceptions):

- 3:30 – 4:20 pm  Lecture, Team Activity
- 4:30 – 5:45 pm  Panel Discussion
- 5:45 – 6:10 pm  Breakout Session
- 6:10 – 6:20 pm  Networking

Teaching methods used by the course include:

- team-based, multidisciplinary
- Biodesign process lectures
- topic panels, with mobile health industry focus
- peer-to-peer learning, with team presentations
- mixed ‘flipped’ classroom model
- experiential learning, with coaches and mentors

STUDENTS RESPONSIBILITIES

Amount of Work Expected
Teams have reported up to 7-9 hours of work each week beyond classroom hours. A majority of the effort is spent researching needs, meeting need coaches and mentors, interviewing stakeholders, and ideating solutions as a team.

Absences
No more than one unexcused absence is permitted. A second absence may be permitted with: written justification by the student; and, fulfillment of a make-up assignment. Two or more unexcused absences will lead to a No CR grade.

GRADING

3 Units – CR/No CR or Letter Grade
Students may elect to attend the course for CR/No Cr or for a Letter Grade. In addition to attending classes, completing readings and participating actively in the classroom environment, students are required to complete a class project exploring a need in mobile health. Projects are chosen from a list of need areas, sourced by Faculty. Teams research and evaluate chosen need areas, translate them into focused need statements, ideate solutions, and objectively assess them against key criteria for satisfying the needs.
Requirements to fulfill a class project:

Registered students:
- select one or more areas of needs from a list of need areas;
- are matched in teams of four students to work on projects;

Teams, once formed:
- work independently and with the support of mentors and coaches;
- translate a need area into a focused need statement;
  - a first version of need statement is due Tuesday, October 10
- continuously iterate based on new research and insights;
  - a collaborative ‘team card’ (google doc) is updated weekly
- present and give feedback to each other during class on two separate dates;
- present to a panel of judges on Wednesday, December 6.

Grading will be based on:
15% Attendance and individual participation in class.
15% Project progress as measured by ‘team card’ updates each week.
15% Peer evaluations: in a confidential surveys, students are asked to evaluate their teammates for dependability, effort, quality of work, and initiative.
20% one-page summary paper on the project, due Friday, December 1.
35% 10-15 slide presentation delivered on Wednesday, December 6. All team members must be present on this date. The slide deck (powerpoint or pdf) must be submitted in advance and no later than noon on Sunday, December 3.

The key criteria we are looking for in the project deliverables are (1) understanding of the need and (2) representation of the biodesign innovation process from need finding to concept. The first is paramount and involves a clearly formulated and well researched need statement. The second involves a strong process towards solution generation and selection (originality and potential for impact will be praised), with attention to opportunities for technical development (feasibility) and delivering strategies (sustainability, as can be achieved after thorough understanding of the competitive and stakeholder landscape).

By focusing on the need and how students have applied the innovation process to address it, teams will demonstrate that their solution has a reasonable likelihood of being accepted by all stakeholders. In evaluating the projects, we will place greater emphasis on evaluating the caliber of the research performed and what students have learned. High quality of content and deliverables is most important, and is always preferred over quantity with limited insight. Additional information on the final presentations and past examples of project papers and slides will be distributed in November.

All deliverables should be submitted on Canvas for review by the lead Director, Marta Gaia Zanchi.
Teams who present their ideas in class on December 6 and are awarded best by a judging panel will be eligible to register for additional credit and received extension funding during the following quarter(s) through Biodesign NEXT.

COURSE MATERIALS

All course materials are found on the Canvas website, consisting mostly of information on guest speakers and real-world examples of mobile health technologies. Presentation slides from the speakers who give consent will also be posted on Canvas.

CONTACT INFORMATION

Course Directors
Marta Gaia Zanchi, Ph.D. mgzanchi@stanfordalumni.org
Paul Gordon Yock, M.D. Assistant: Annette Ewanich, ewanicha@stanford.edu

Teaching Assistant
(To Be Announced) @stanford.edu

A course offered by:

318 Campus Drive, Clark Center, Rm E100, Stanford University, CA 94305-5428

Information for Students with Disabilities

Students with Documented Disabilities: Students who may need an academic accommodation based on the impact of a disability must initiate the request with the Office of Accessible Education (OAE). Professional staff will evaluate the request with required documentation, recommend reasonable accommodations, and prepare an Accommodation Letter for faculty dated in the current quarter in which the request is made. Students should contact the OAE as soon as possible since timely notice is needed to coordinate accommodations. The OAE is located at 563 Salvatierra Walk (phone: 723-1066, URL: http://studentaffairs.stanford.edu/oaе).
APPENDIX:

PAST GUEST SPEAKERS AND CONTRIBUTORS

- Abby C. King, Professor of Health Research & Policy and Medicine, Director, Healthy Aging Research & Technology Solutions laboratory, SPRC, Stanford University
- Abhas Gupta, Principal, Wildcat Venture Partners
- Adam Schlfke, Health & Technology Innovator, Entrepreneur, Investor, Anesthesiologist
- Adrian Aguilera, Assistant Professor, University of California Berkeley
- Alex de Winter, Director, GE Ventures, Healthcare
- Alexander Anthony Morgan, Scientist in Residence, Khosla Ventures
- Alison Bloch, Health & Technology Strategy Independent Consultant, formerly led mHealth Programme, GSM Association's Development Fund
- Amar Kendale, Vice President of Strategy and Market Development, mc10 Inc.
- Amish Parashar, Venture Partner, Yamaha Motor Ventures & Laboratory
- Amy Tenderich, Founder & Editor, DiabetesMine
- Andrea Mason, Director of Science and Strategy, CTO at Telbios
- Andrew Atwell, Principal, Open Innovation Center, Samsung
- Andrew Broderick, Research Program Director, Public Health Institute
- Andrew Lee, Co-Founder, StartX MED
- Andy McGibbon, Co-Founder at Müvr Labs
- Anna de Paula Hanika, Open mHealth
- Anil Sethi, Serial Entrepreneur, Founder & CEO, Gliimpse

- Anurag Mairal, Director, Global Exchange Programs, Stanford University
- Arnold Milstein, Professor of Medicine, Stanford University, Director, Stanford Clinical Excellence Research Center (CERC)
- Asha Nayak, Global Medical Director, Intel Corporation
- Ben Wilson, Director, Intel Global Healthcare Strategy
- Bassam Kadry, MedicineX Director of Technology Discovery, Stanford School of Medicine
- Bryant Lin, Clinical Assistant Professor of Medicine, Medical Director of the Consultative Medicine Clinic, Stanford University
- Cecilia Corral, Chief Design Officer, CareMessage
- Cheryl Cheng, Partner, BlueRun Ventures
- Chris Furmanski, Director of Innovation, Stanford Health Care
- Christina Claire Lane, Visiting Associate Professor, Orthopaedics, Stanford University
- Christine Nguyen, Founder, Footsteps
- Chuck Sted, (former) CEO and CFO, Hawaii Pacific Health
- Dan Weberg, PhD, MHI, RN, Director, Nursing Innovation, Kaiser Permanente (KP) Information Technology’s Innovation & Advanced Technology Group (IAT)
- David E. Goodman, Co-Founder, FeetFirst
- David Haddad, Executive Director, Open mHealth
• David Myung, Resident Physician, Byers Eye Institute, Stanford University and Co-Founder & Chief Scientific Officer, Biomemedica, Inc.
• David Sayen, Region IX, CDR U.S. Public Health Service, Centers for Medicare Medicaid Services
• David Zapol, Social Entrepreneur
• Deborah Dean, MD, Founder and Executive Director, Children’s Global Health Initiative
• Deborah Kilpatrick, Chief Executive Officer, Evidation Health
• Dennis Boyle, Partner & Founding Member, IDEO, IDEO’s Health & Wellness Business
• Dianna Kane, Senior Designer, Medic Mobile
• Divya Nag, Founder, StartX Med, now Special Projects, Apple
• Elli Kaplan, CEO, Neurotrack
• Eric Leroux, ER Resident Physician, Stanford School of Medicine
• Euan Ashley, Associate Professor of Medicine, Stanford University Medical Center
• Dan Riskin, Chief Executive Officer, Vanguard Medical Technologies
• David Hopkins, Senior Advisor, Pacific Business Group on Health
• Farzad Azimpour, MD, Biodesigner + Cardiologist, IDEO
• Greg Sommer, Co-Founder and CEO at Sandstone Diagnostics, Inc.
• Gloria Lau, Equity Partner, Data Collective
• Fay Xing, Partner, Wuxi Healthcare Ventures
• Geetha Rao, PhD, Vice President Strategy & Risk Management, Triple Ring Technologies
• Geoffrey Clapp, Mentor/Advisor, many Healthcare and Technology Startups
• George Savage, Founder, CMO, Proteus Digital Health
• Grace Bartoo, President, CEO, Decus Biomedical
• Greg Sommer, Co-Founder and CEO at Sandstone Diagnostics, Inc
• Hilary Spindler, Sr. Data Research Analyst, UCSF Global Health Sciences
• Ibrahim Sezan, Senior Director of Technology, Qualcomm
• Ida Sim, Professor, Division of General Internal Medicine, UCSF; Co-Director of Biomedical Informatics, UCSF Clinical and Translational Sciences Institute
• Jacob Reider, Co-Founder, RS Partners
• Jacques Robert, Senior Vice President, Wealth Strategy, Destination Wealth Management
• Jay Watkins, Managing Director, De Novo Ventures
• Jenna Tregarthen, Founder, CEO, Recovery Record
• Jordan Shlain, Founder and Chairman at HealthLoop
• Josh Makower, General Partner, NEA
• Josh Nesbit, Chief Executive Officer, Medic Mobile
• Juan-Pablo Mas, Partner, Action Potential Venture Capital
• Jules Sherman, Designer, Entrepreneur & Lecturer, JS Design Group
• Julia Hu, Founder, CEO, Lark
• Julie Papanek, Principal, Canaan
• James Kennedy Wall, MD, Assistant Director, Biodesign Innovation Fellowship Program
• Jaspal Sandhu, Founding Partner, Gobee Group
• Jagjot (J.J.) Singh, Investor, Advisor, CEO, several Digital Health companies
• Karen Drexler, Director | Compensation Committee Chair | Audit Committee, Diadexus
• Kiki D. Chang, Director, Pediatric Bipolar Disorders Program, Professor of Psychiatry and Behavioral Sciences, Stanford University Medical Center
● Kyra Bobinet, MD/MPH, CEO, engagedIN,
● Kunal Sethy, Director of Operations, Zephyr Health
● Larry Chu, Executive Director, Stanford Medicine X, Associate Professor of Anesthesia, Stanford University School of Medicine
● Lyn Denend, Director, Academic Programs at Biodesign, Stanford University
● Lynne Chou, Partner, KPCB
● Lucy Kalanithi, Postdoctoral Fellow, Clinical Excellence Research Center, Stanford University
● M. Rami Bailony, Senior Advisor, Telemedicine, Stanford Medicine X, Hospitalist, Kaiser Permanente
● Manu Prakash, Assistant Professor, Bioengineering, Stanford University
● Marco Smit, Managing Director & Founder, Next Innovation Health Partners
● Mark Zdeblick, Founder, CTO, Proteus Digital Health
● Mary Rosenberger, Postdoctoral Fellow, Psychology, Stanford University
● Mark Zdeblick, Chief Technology Officer, Proteus Digital Health
● Matthew Smuck, Chief of PM&R and Associate Professor of Orthopaedic Surgery, Stanford University, Founder and Director, Wearable Health Lab
● Mike O’Reilly, MD, Vice President, Special Projects Group, Apple
● Missy Krasner, Managing Director, Healthcare & Life Sciences, Box, & Special Advisor, Canvas Venture Fund
● Mitchell Mom, Venture Associate, Rock Health
● Mohit Kaushal MD, MBA, Partner, Aberdare Ventures, Advisor to the National Committee on Vital and Health Statistics, US Department of Health and Human Services
● Monique Lambert, Medical Ethnographer, Investigator, Palo Alto Medical Foundation
● Nina Kjellson, General Partner, Interwest
● Oliver Aalami, Vascular and Endovascular Surgeon, Stanford University
● Partha Ray, Managing Director, Kalyan Medical & Board Member, Life Science Angels
● Philip Sager, Consulting Professor, Stanford Cardiovascular Institute (CVI)
● Phillip Olla, CEO, Mobile Diagnostics Services
● Piya Sorcar, Founder, CEO, Teach Aids
● Raj Bhargava, Fellow, Distinguished Careers Institute at Stanford University
● Renee Ryan, Vice President, Investor, JJDC at Johnson & Johnson
● Rebecca Coelius, (former) Director of Health and Human Services, Code for America
● Rebecca Lynn, Partner, Morgenthaler Ventures, Information Technology Team
● Rick Altinger, CEO, Glooko
● Rick Valencia, Vice President, Qualcomm & Founder, General Manager, Qualcomm Life
● Robert Chang, Assistant Professor of Ophthalmology, Stanford University Medical Center
● Roger Chen, Associate, O’Reilly AlphaTech Ventures
● Ryan Bloom, Founder, Factor 14
● Ryan Van Wert, Founder, Vynca
● Rush Bartlett, Founder, Vynca
● Ryan Panchadsaram, (former) U.S. Deputy Chief Technology Officer, White House
● Sami Hamade, Partner, Apple Tree Partners
● Samir Medjebar, CEO, adScientiam
● Sanjay Shah, Senior Program Officer, California HealthCare Foundation
● Sarah Mummah, Product Manager & Creator of Vegethon iPhone App, Stanford University School of Medicine
● Sean Nola, (former) Distinguished Engineer & Chief Architect, Microsoft Health Solutions Group
● Sonny Vu, CEO & Founder, Misfit Wearables (acquired by Fossil)
● Stephanie Habif, Healthcare Design Strategist. Stanford Calming & Persuasive Labs, Habif Health
● Sumbul Desai, MD, Clinical Assistant Professor, Associate Chief Medical Officer, Strategy and Innovation, Stanford Hospital and Clinic
● Susan Dybbs, Managing Director & Interaction Design Practice Lead, Cooper
● S. V. Mahadevan, MD, FACEP, FAAEM, Associate Professor of Surgery/Emergency Medicine Director, Stanford Emergency Medicine International, Stanford University School of Medicine
● Thomas Goetz, co-founder, Iodine & author, "The Decision Tree: Taking Control of Your Health in the New Era of Personalized Medicine"
● Tyler Haydell, Data Insights Engineer, Flatiron Health
● Uday N. Kumar, MD, Fellowship Director, Global Biodesign Programs, Consulting Associate Professor, Bioengineering, Stanford University
